

Amendments To The Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

What is claimed is:

1. (Original) A hand-held dispenser for dispensing a multiplicity of unit products having a storage area for storing the unit products, an outlet opening through which the unit products are dispensable from the dispenser, a dispensing mechanism actuable to dispense the unit products through the outlet opening, and a timing mechanism adapted in use to time the period since last dispensing of a unit product.
2. (Original) The dispenser of claim 1 in which the timing mechanism is adapted in use to indicate the time since last dispensing.
3. (Currently Amended) The dispenser of claim 1 ~~or 2~~ having a display forming part of the timing mechanism on which, in use, the time since last dispensing is graphically indicated thereon.
4. (Currently Amended) The dispenser of claim 1, ~~2 or 3~~ wherein the timing mechanism has a controller programmed with a predetermined dispensing regime for dispensing of the unit products and the controller controls the timing mechanism so that it provides an alert when dispensing of the unit products is required in accordance with the dispensing regime.
5. (Currently Amended) The dispenser of claim 1 ~~any one of the preceding claims~~ wherein the timing mechanism is an electronic timing mechanism.

6. (Currently Amended) The dispenser of claim 3 ~~or either one of claims 4 and 5 when appended on claim 3~~ wherein the display is an electronic display.
7. (Currently Amended) The dispenser of claim 1 ~~any one of the preceding claims~~ further having a dispensing indicator for indicating the number of unit products left in, or dispensed from, the dispenser.
8. (Original) The dispenser of claim 7 wherein the dispensing indicator is integrated with the dispenser such that it is automatically updated in response to the dispensing of the unit products therefrom.
9. (Currently Amended) The dispenser of claim 7 ~~or 8~~ in which the dispensing indicator has a display to indicate the number of unit products left or dispensed.
10. (Original) The dispenser of claim 9 in which the dispensing indicator is adapted to represent the number of unit products left or remaining in graphical form on the display.
11. (Original) The dispenser of claim 10 in which the number of unit products is represented with numerical indicia.
12. (Currently Amended) The dispenser of ~~any one of claims 7-11~~ in which the display is an electronic display.
13. (Currently Amended) The dispenser of ~~any one of claims 7-12~~ wherein the dispensing indicator is an electronic indicator.
14. (Currently Amended) The dispenser of ~~any one of claims 7-13~~ in which the dispensing indicator is a dispensing counter.

15. (Currently Amended) The dispenser of claim 1 ~~any one of the preceding claims~~ having the unit products.
16. (Original) The dispenser of claim 15 wherein the unit products are pharmaceutical products.
17. (Original) The dispenser of claim 16 wherein the pharmaceutical products are oral dosage forms.
18. (Currently Amended) The dispenser of claim ~~15, 16 or 17~~ wherein the unit products are pills.
19. (Currently Amended) The dispenser of claim 1 ~~any one of the preceding claims~~ in which the dispensing mechanism is adapted to dispense a predetermined number of unit products per actuation.
20. (Original) The dispenser of claim 19 wherein the predetermined number is one.
21. (Currently Amended) The dispenser of claim 1 ~~any one of the preceding claims~~ wherein the storage area is provided in a first dispenser part and the timing mechanism and outlet opening are provided in a second dispenser part attached to the first dispenser part.
22. (Original) The dispenser of claim 21 wherein the dispensing mechanism is provided in the second dispenser part.
23. (Currently Amended) The dispenser of claim 21 ~~or 22~~ wherein the first and second dispenser parts are releasably attached.
24. (Currently Amended) The dispenser of claim ~~21, 22 or 23~~ wherein the first dispenser part has an access opening through which the unit products are transferable from the storage area into the second

dispenser part and the dispenser has a closure which is selectively connectable with the first and second dispenser parts to respectively close the access opening and the outlet opening.

25. (Original) The dispenser of claim 24 wherein the closure is a cap.
26. (Currently Amended) The dispenser of claim 24 ~~or 25~~ wherein the closure, on the one hand, and the first and second dispenser parts, on the other hand, have co-operable connecting structures for selectively connecting the closure to the first and second dispenser parts.
27. (Original) The dispenser of claim 26 wherein the connecting structures on the first and second dispenser parts are the same.
28. (Currently Amended) The dispenser of claim 26 ~~or 27~~ wherein the second dispenser part has a further connecting structure which is co-operable with the connecting structure of the first dispenser part which co-operates with the connecting structure of the closure to enable connection of the first and second dispenser parts.
29. (Currently Amended) The dispenser of claim 1 ~~any one of the preceding claims~~ in which the timing mechanism is operatively coupled to the dispensing mechanism so as to be actuated in response to actuation of the dispensing mechanism.
30. (Currently Amended) The dispenser of claim 1 ~~any one of the preceding claims~~ in which the timing mechanism is operatively coupled to a detector adapted to detect the dispensing of a unit product from the dispenser whereby the timing mechanism is actuated in response to the detector detecting dispensing of a unit product.

31. (Currently Amended) A dispensing module for attachment to a container for a multiplicity of unit products in the form of the second dispenser part of claim 22 ~~or any claim appendant on claim 22.~~
32. (Canceled)
33. (Canceled)
